PRINCE & CO.

Linnæan Gardens and Nurseries.

(Founded, 1732.)

FLUSHING, LONG ISLAND, N. Y.

CATALOGUE OF
SELECT STRAWBERRIES,
SMALL FRUITS, &c.

PERSONS REQUIRING GENERAL INFORMATION ON THE SUBJECT CAN ADDRESS THEIR APPLICATIONS TO WM. R. PRINCE, WHO HAS LONG MADE THE CULTURE OF THE STRAWBERRY A SPECIFIC OBJECT OF HIS ATTENTION.

All orders should be sent direct by mail. The Plants, &c., are all labeled and packed in a superior manner. Strawberry Plants can be packed so as to be sent safely at any season. The best periods for planting, are March and April, and August 20th to November. We puddle roots, and do not loose one per cent. Parcels can be sent by Mail, if desired, at 8 cents per lb. If purchasers do not specify, we send by Mail or Express. No less than a dozen are sold of any variety, unless otherwise stated in the Catalogue. Persons ordering will please specify the Edition of the Catalogue. Terms, Cash with the order, or collected by Express, on delivery.

Our Catalogues of Fruit and Ornamental Trees, Shrubs, Plants, Grapes, Bulbous Roots, Pæonies, Green House Plants, Seeds, &c., will be sent to applicants who enclose stamps. Also, the Wholesale Catalogue for Nurseries.

The 250 varieties embraced in our entire collection of STRAWBERRIES, including the newest Foreign Varieties, are fully described in communications from WM. R. PRINCE, in the Patent Office Report for 1861, and in various periodicals. Another elaborate article on the Fragaria Family will be found in the Transactions of the American Pomological Society, for 1862; and one more comprehensive will be found in the forthcoming Transactions of the American Institute. We therefore, deem it only necessary here to describe the New Varieties. The public taste has become so awakened to the appreciation of the sweet, high-flavored and perfumed varieties of the Strawberry, that such berries as the Wilson, Downer, Austin, &c., will not be tolerated by persons familiar with good fruit; and the new varieties presented to us, during the past three years, as Seedlings from the Wilson, very large, but sour and insipid, ought to satisfy every amateur,

that when desirous of obtaining sweet and fine-flavored Seedlings, we must select the seed from parents possessing these qualities. We now offer a few of our superior New Seedlings with descriptions, and there is not an acid or inferior one among them. Of the following assortment, 40 of the most splendid varieties, designated by an asterisk (*), were originated in our own Nurseries, and selected from thousands of seedlings. Several of these have white flesh, and there is not one of them that is not superior in flavor to Russell's Prolific, and to all the Wilson Seedlings recently announced. The *American Varieties* possess the advantage of great hardihood and productiveness, and are suitable for field culture. Hermaphrodite Varieties should be grown in rows or hills, but Pistillates may be allowed to cover the entire ground. The latter will require one-tenth of Hermaphrodites to fertilize them, which can be grown in distinct beds, and as these are also fruit bearing, no space is lost, as has been alleged. If the beds are within 50 feet of each other, the impregnation will be perfected. It is a positive normal fact, based on physical structure, that the Pistillate Varieties of any species of the Strawberry, will produce a crop fifty per cent. greater per acre than the Hermaphrodites can possibly do, as has been fully demonstrated in an article on the Fragaria Family, read before the American Institute, and to be published in their forthcoming Transactions. Any person who ignores the natural existence of Pistillates, furnishes us an evidence of his ignorance of Nature's facts and purposes; and any one who will devote ten minutes to a search in the forest can obtain proof of the fact. In field culture, when planted in rows 2 by 2½ feet, it requires 9,000 plants to an acre. H, denotes hermaphrodites—P, pistillates.

We invite all Amateurs to inspect our collection at the fruiting season, it being the most extensive and at the same time the most select one in our country and unequalled in Europe, and the only one where all the species of the Strawberry family are assembled. Amateurs can here form a correct judgment as to the average size and productiveness of the Varieties, whereas the exhibitions of selected and often of misnamed berries are deceptive, and result in disappointments. The precision and accuracy in our gardens is such, that we have offered \$100, if one erroneous plant could be found. We refer to Professor Huntsman, our best-informed amateur, to Joan W. Chambers, Esq., Secretary of the American Institute, and to Dr. Tremble, of Newark, N. J., as to the great superiority of our collection over all others, and as to its systematic arrangement. We caution the public against such acts as have been practiced with the Bartlett and others, by giving new names to old varieties; by selling Lennig's White under three names as if distinct, and also forcing on the public such comparatively poor varieties as will be found named in our Rejected List, at page 12.

NORTH AMERICAN VARIETIES.

	Moyamensing , valueless. <i>Rejected.</i>			
46.	*Navarino , H, rather large, crimson, sweet, good, productive, suitable for market.....	50	2 00	12 00
	Nero , inferior. <i>Rejected.</i>			
47.	Newark Prolific, or Green Prolific (Boyden), P, large, scarlet, rounded, beautiful, fair flavor, juicy, very productive, a showy market berry...	1 00	4 00	
48.	Newland or Chilian , H, medium to large, con- ical, deep scarlet, very sweet, rich, juicy, excel- lent flavor, long bearing, firm for market, strong upright peduncles.....	38	1 50	
49.	*Ophelia , H, large, splendid, obovate, a seedling of Scarlet Magnate, and its best fertilizer.....	50	2 50	12 00
	Orange Prolific , very acid. <i>Rejected.</i>			
50.	*Pauline , P, new, very large, obovate, bright scarlet, beautiful, very juicy, acidulate, good flavor, rather late; plant vigorous, produc- tive.....	2 00		
51.	*Perfumed Cone , P, medium size, exquisite flavor	1 00	4 00	12 00
52.	*Primate , H, rather large, deep scarlet, very firm for market, very productive.....	25	1 00	7 00

		p. doz \$ cts.	p. 100 \$ cts.	p. 1000 \$ cts.
53.	* Prince's Large Climax , P, bright scarlet, conical, splendid, sweet, excellent flavor, very productive.....	1 00	4 00	20 00
54.	* Prince's Scarlet Excelsior , P, very large, deep scarlet, sweet, high flavored, very productive..	1 00	4 00	20 00
55.	* Prince's Late Globe , P (Iowensis), large, bright scarlet, acidulate, ripening ten days after the main crop; very valuable as a late market berry	1 00	4 00	12 00
56.	* Princeps , P, new, very large, long cone, dark crimson; flesh scarlet, sweet, fine flower; plant vigorous, productive.....	2 00		
57.	* Regina , P, a female seedling of Longworth's Prolific, much resembling the parent, but more productive.....	1 00		
58.	* Rosina , H, new, large, round, light scarlet, sweet juicy, excellent.....	2 00		
59.	Russell's Prolific (Iowensis), P, very large, obtuse, conical, bright scarlet, acid, rather soft, juicy, good flavor, apt to be hollow, productive, vigorous. This is evidently a seedling of the Austin.....	1 00	9 00	
60.	* Seraphine , P (Iowensis), monstrous, splendid, pleasant, flavor, very productive.....	1 00	4 00	12 00
61.	* Sempronia , H, monstrous, obtuse cone, bright deep scarlet; flesh white, sweet, good flavor, a remarkable berry; plant very vigorous, tall, broad foliage, productive, estimable for market	1 00	4 00	12 00
62.	* Scarlet Magnate , P, the heaviest, and most solid berry for market carriage, bright scarlet; an admirable market fruit, surpassing Hovey in average size.....	50	2 00	
	Scott's Seedling , worthless. <i>Rejected.</i>			
63.	Stewart , H, (Iowensis), esteemed for market in Maryland, where nine-tenths are of this variety.	50	2 00	12 00
64.	* Sultana , H, early, very large, light orange scarlet, sweet, fine flavor; plant very productive, vigorous, very hardy.....	1 00	4 00	12 00
65.	* Suprema , P (Iowensis), early, large, sprightly flavor, very productive.....	1 00	4 00	12 00
66.	Trevirana , P, large, sprightly flavor, estimable...	50	2 00	12 00
67.	* Terpsicore , H, early, large, conical, bright scarlet, beautiful, sweet, good flavor, firm for market; plant vigorous, strong, erect peduncles...	1 00	4 00	12 00
	Triomphe de Gand , see Pine Strawberries.			
68.	Union (Crane), H, large, rounded or ovate, scarlet, soft, good flavor.....	50	2 50	

in the field as Victoria

	p.do \$ cts.	p. 100 \$ cts.	p. 1000 \$ cts.
69. *Valencia, H, early, large, bright scarlet, good flavor, valuable	50	2 50	12 00
70. *Victorine, H (Iowensis), early, very large, conical, bright scarlet, juicy, good flavor, firm, showy for market; plant very productive and vigorous	1 00	4 00	12 00
Victory, very sour. Rejected.			
71. *Welcome, H, the greatest acquisition yet made as an early berry; large bright scarlet, beautiful, sweet, fine flavor, firm, don't rot, always clean; plant very vigorous, every flower perfects a berry. It is the earliest and most valuable market berry, and destined to supersede all other early berries; far superior to Jenny Lind in size and flavor, and produces double the quantity per acre	2 00	10 00	50 00
White Pineapple. See Lennig's White.			
72. Wilson, H, character well known; produces only two-thirds as much as the productive pistillates,	25	75	4 00

Pine Strawberries

English, French, and Belgian Varieties.

These are all of the Pine family (*Fragaria Grandiflora*) up to No. 183, and the most of them are of Belgian origin, and of a much more hardy character than the English varieties which have been heretofore introduced and discarded. They produce very large and beautiful berries, with white, and some with rosy flesh, and are remarkable for their sweetness, exquisite flavor, and perfume. The Triomphe de Gand has become most generally known, but there are numerous varieties greatly superior to it in sweetness and flavor. Being of Tropical parentage, the Pine family require a warm location, a strong, rich soil, and to be cultivated in rows or stools, and kept free from runners. They are well worthy the special attention of amateurs. All these are Hermaphrodites.

	p.do \$ cts.	p. 100 \$ cts.
131. Ambrosia (Nicholson), very large, glossy crimson, very sweet, mulberry flavor	1 00	
132. A. Retemeyer (Jonghe), very large, ovate, vermilion; flesh salmon, exquisitely sweet	2 00	
133. Beauty of England (Frewin), very large, oblong, compressed, glossy crimson, sweet, perfumed	75	
134. Bicton White Pine, large, beautiful	50	
135. Bonté de St. Julien (Carre), medium size, crimson, conical, sweet, very juicy, excellent flavor; plant very hardy, productive	38	2 00
136. Caroline, Red or Old Pine, large, bright scarlet, highest flavor, poor bearer	30	
137. Caroline, Rosy White, large, beautiful, very productive, fine flavor	1 00	
138. Carolina Superba (Kitley), very large, orange scarlet, splendid; flesh white, very high flavor, late; hybrid Chili	50	

		p. doz \$ cts.	p. 100 \$ cts.
140.	Crimson Queen (Myatt), large, deep crimson, sweet, moderate crop.....	30	1 00
141.	Delices du Palais (Nicaise), round, glossy crimson, sweet, extremely perfumed, delicious.....	2	00
142.	Deptford White or Excelsior , white with blush tinge, long cone, variable form.....	38	2 00
143.	Duc de Malakoff (Gloede), monstrous, deep crimson, Apricot flavor, burns badly.....	38	2 00
144.	Duke of Cambridge (Stewart & Neilson), splendid, large, conical, bright scarlet; flesh rosy white, sweet, high flavor.....	2	00
145.	Duchesse de Beaumont (Lorio), large, glossy red, rosy flesh, sweet, perfumed flavor.....	2	00
146.	Eleanor (Myatt), monstrous, glossy scarlet, high flavor, one of best late; hybrid Chili. \$2 for six.		
147.	Emily (Myatt), monstrous, bright rosy, white flesh, fine flavor; hybrid Chili. \$2 for six.		
148.	Emma (Jonghe), large, obovate, glossy crimson, splendid; flesh rosy white, delicate, sweet, mild flavor....	2	00
149.	Empress Eugenie (Knevett), monstrous, deep red, ovate or coxcomb; flesh red, very sweet, exquisite, perfumed flavor.....	2	00
150.	Frogmore Late Pine (Ingram), superior to all other late strawberries; monstrous, conical, brilliant crimson, very beautiful; flesh very juicy, rich, sprightly, and perfumed. A most remarkable plant for the size of its foliage, flowers, and fruit. \$2 for four.		
151.	Garibaldi (Nicholson), very large, oval, bright red, sweet, very juicy, high flavor. \$2 for six.		
152.	Imperatrice Eugenie (Gauthier), large, conical, glossy roseate; flesh rosy white, sweet, perfumed.....	2	00
153.	Jaminette (Belgian), very large, beautiful, conical, some variable, bright red; flesh rosy, firm, sweet, juicy, excellent flavor. This has proven the most vigorous and hardy of all the Pines, and produces abundantly in all soils and situations. It will be found to greatly surpass the Triomphe de Gand in vigor, and in the excellence and quantity of the crop in field culture. The foliage never burns in summer, and the plant is never injured by the winter.....	1 00	5 00
154.	Jucunda (Salter), large, variable form, bright red, sweet, good.....	50	3 00
155.	Jung Bahadoor (Nicholson), large, obtuse cone, crimson; flesh rosy, sweet, delicious.....	2	00
156.	La Constante (Jonghe), regular cone, large, bright crimson; flesh rosy, sweet, exquisite flavor, late, burns considerably.....	50	2 00
157.	La Chalonnaise (Nicaise), very large, beautiful, conical or flat, vermilion, juicy, sweet, excellent.....	75	

158.	La Delicieuse (Lorio), large, orange scarlet, yellow flesh	1 00
159.	La Grosse Sucrée (Jonghe), large, oblong, crimson; flesh white, sweet, highly perfumed, late. \$2 for six.	
160.	La Sultane (Nicaise). La Constante is selling under this name. We have a few genuine plants.	
161.	Lorio (Lorio), the earliest of all Pines, ripe June 5th, with the earliest scarlets, and continues three weeks; very large, brilliant scarlet, long cone, compressed; flesh rosy, very sweet, perfumed; plant very hardy and vigorous. An estimable family berry.	2 00
162.	Lucas (Jonghe), the same as La Constante . Of remarkable character, very large, obtuse cone, bright crimson; flesh rosy white, juicy, sweet, extremely rich, of the most delicious flavor, never surpassed; splendid foliage. Six plants for \$3.	
164.	Marguerite (Lebreton), monstrous, oblong form, glossy red; flesh orange, sweet, high flavor.	1 00
165.	Mrs. D. Neilson (Stewart & Neilson), variable form, large, orange scarlet; white flesh, high flavor, very late.	2 00
166.	Napoleon III. (Gloede), large, round or compressed, bright rosy; flesh white, sweet, very high flavor, late; hybrid Chili.	2 00
167.	Orb (Nicholson), very large, rounded, bright roseate; flesh yellow, buttery, sweet, exquisite. \$2 for six.	
168.	Ornement des Tables (Soupart), very large, obtuse cone, orange scarlet, splendid, very sweet, delicious perfume; peculiarly beautiful foliage.	1 00
169.	Oscar (Bradley), large, conical or coxcomb, glossy crimson, very sweet, exquisite aroma; plant vigorous.	50 2 50
170.	Prince Alfred (Stewart & Neilson), monstrous, vermillion, white flesh, very sweet, perfumed; hybrid Chili. \$2 for six.	
171.	Prince Arthur (Ingram), large, light orange scarlet, long, conical; flesh white, sweet, pleasantly acidulate; hybrid Chili. \$2 for six.	
172.	Prince Imperial (Graindorge), moderate size, glazed red; flesh rosy, sweet, good.	50 2 50
173.	Princesse Fred. William (Niven), rounded, bright scarlet; flesh rosy, firm, sweet, high flavor.	50 3 00
174.	Princesse Royale (Pelvilian), large, conical, deep scarlet, acidulate; plant hardy and vigorous; highly esteemed at Paris for preserves.	50 2 50
175.	Quinquefolia , or Five-Leaved (Myatt), large, roseate, sweet, rich, fine flavor, late.	75
176.	Robert Trail (Jonghe), monstrous, brilliant scarlet, conical, flesh rosy, sweet, juicy, exquisite; late.	2 00

Early Royal Victoria

		p. doz \$ cts.	p. 100 \$ cts.
177.	Scarlet Rock , large, round, very sweet, delicious; plant vigorous, very hardy.....	1 00	4 00
178.	Salmon or Buff , large, light orange scarlet, moderate; crop very hardy.....	1 00	3 00
179.	Sir C. Napier , large, vermilion, beautiful, white flesh, excellent.....	50	
180.	Surprise (Myatt), enormous size, variable form, pale orange; flesh white, pleasant flavor, late. An extraordinary berry. Hybrid Chili.....	1 00	
181.	Triomphe de Gand , character well known, inferior to other Pine varieties in sweetness and flavor, as well as in productiveness. <i>Not for sale</i>	25	1 00
	(Per 1,000, \$5 to \$6.)		
182.	Wizard of the North (Robertson), conical, large, crimson, sweet, good flavor; plant very productive, and one of the most hardy and vigorous, <i>Not for sale</i>	50	3 00
183.	Wonderful (Jeyes), very large, roseate, fine flavor.....	50	
See Rejected Pine Varieties, page 12.			

CHILI STRAWBERRIES.

The peculiar character of this family is the great vigor of the plants, large foliage, and strong petioles and peduncles, all of which are downy or hairy, and flowers often the size of a dollar; the later ripening of the fruit, after the Pines; the monstrous and variable size of the berries, white flesh, highly perfumed, very juicy, sweet and delicious; and, in some varieties, a sprightly, acidulate flavor commingled with the sweetness. They make but few runners, and being therefore scarce, we supply them only to special Amateurs. All these are Herma-phrodite.

Notice—There is no one plant of the true Chili varieties for sale by any other Nursery in the Union, and we shall confine our sales solely to Amateurs.

210. **Chili Crimson**, the original, monstrous, variable form, pleasantly acidulated flavor. For four, \$1.
211. **Chili Bright Roseate**, very large, very high flavor, glossy, deep green foliage. Per pair, \$2.
212. **Chili Pale Orange**, monstrous. For four, \$2.
213. **Chili Bright Orange**, yellowish flesh, very sweet, perfumed. Per pair, \$2.
214. **Chili Rosy Orange**, very large, perfumed, exquisite. Per pair, \$1.50.
215. **Chili Large Vermilion**, monstrous, beautiful, excellent. For four, \$1.50.
216. **Chili Brilliant Scarlet**, one of finest late berries. For four, \$2.
217. **Chili Brilliant Rosy**, large, round, sweet, and pleasantly acidulated. For four, \$2.
218. **Chili Monstrous Vermilion**, splendid, sweet, aromatic. Per pair, \$2.
219. **Chili Orange Scarlet**, oval, juicy, sweet, aromatic. For four, \$2.
220. **Suprema**, orange scarlet, delicate, high flavor. For four, \$1.50.
221. **Vilmorin**, very large, crimson, exquisite flavor. For four, \$1.50.
222. **Chili Deep Crimson**, firm, juicy, sweet, delicious. For four, \$2.

HAUTBOIS STRAWBERRIES.

This class possesses a high musk flavor, for which they are greatly esteemed. It is called, "The Real Amateurs' Strawberry." All are Hermaphrodites, except one Male or Staminate, which should be planted with any that are defective in stamens, in the proportion of one to ten.

ORNAMENTAL.

Indica or Yellow Flowering, very ornamental, flowering and fruiting throughout the year. Ten plants for 50 cents.

WHOLESALE PRICES—DEDUCTIONS FOR LARGE QUANTITIES.

For 50 plants of any variety, the price will be $2\frac{1}{2}$ times the price named for a dozen.

A Wholesale Catalogue will be sent to Nurseries. By the 1,000 or 10,000, the price for standard varieties, assorted, will be \$4 to \$6 per thousand, or ten per cent. lower than any other advertised prices.

Assortments.—For \$10 we will supply 100 plants each of as many kinds as amount, by this Catalogue's prices, to \$12.

For \$20, we will supply 100 plants each of as many leading kinds as amount, per Catalogue, to \$25.

Any assortments offered by other venders for \$5 and \$10, up to \$50 and \$100, we will supply for the same amount, and *will add 10 per cent. in fine plants, gratis*, but purchasers can make much better selections from our most extensive collection.

The permanent rule will be, in regard to this and all other Fruits, to price them as low, and usually much lower, than obtainable elsewhere.

☞ The postage on Strawberries will be about five to eight cents per dozen, according to the vigor of the different varieties.

REJECTED VARIETIES OF STRAWBERRIES.
